FLUXUS Scores Writing Game

City game at Fluxus Festival, Kaunas, Lithuania, 2024

social

rituals

This was an interactive public art game inspired by the Fluxus movement and the life of Jurgis Mačiūnas. The game encouraged participants to embrace their creativity by collecting words at different stations, which were tied to key moments in Mačiūnas' life. Using these words, players crafted their own Fluxus instructions, much like the avant-garde scores central to the Fluxus ethos. This participatory experience transformed players into artists, celebrating spontaneity, collaboration, and unconventional art-making. Through engaging tasks and playful processes, the game highlighted the collective spirit of Fluxus and invited the public to explore its historical roots in a fun, accessible way.
